

Elite Industrial **Welcomes** Tower Scaffolding & Insulation

Now Part of Elite Industrial

ELITE
INDUSTRIAL

TOWER
SCAFFOLDING + INSULATION

Powered by AIS

**Elite Industrial welcomes Tower
Scaffolding & Insulation to the team.**

We're proud to announce that Elite Industrial has acquired Tower Scaffolding, bringing dedicated scaffolding and insulation services into the AIS Group family.

Scaffolding touches nearly every outage, refractory campaign, and capital project we perform. Bringing it in-

house means our crews control the schedule from access to mobilization.

For our customers this is another great addition at the [AIS Group](#).

72nd Mississippi Lumber Manufacturers Association Convention & Trade Show

Two of our companies represented American Industrial Services at the 72nd Mississippi Lumber Manufacturers Association Convention & Trade Show in Biloxi, MS!

Elite Industrial and Southern Welding were on the ground at the Beau Rivage Resort and Casino connecting with leaders across the lumber and forest products industry.

Thank you to everyone who stopped by to talk with Bobby Cason, Bobby Cason III, DJ Smith, and Kody Petty. Here's to the relationships built and the conversations ahead.

At [AIS Group](#), this is what it's all about, growing the team and showing up for the industries that keep America running.

► JULY CASE STUDY

Secondary Aluminum Producer | New Cast House

Build

A complete six-unit cast house was fabricated, erected, and refractory-lined as a single coordinated project — delivering full operational capacity with zero safety incidents.

6

Units Built & Lined

450 MT

Total Melt Capacity

0

Safety Incidents

A secondary aluminum producer set out to build an entire new cast house. That included six major melting and holding units, fabricated, erected, and refractory-lined from the ground up. A build that size normally means juggling separate specialist contractors across

disconnected scopes. They wanted it run as one project instead.

They called **AIS Group**. We deployed three of our entities on a single unified project. Fabrication and field work were coordinated end to end, so steel, erection, and lining moved together without the rework delays that stall a build like this.

The scope: 4 melters with Electromagnetic Stirring (EMS) and 2 holders — 450 MT of total capacity, 75 MT per unit. The EMS units use electromagnetic forces to agitate the molten aluminum during the melt cycle, improving uniformity and efficiency. In all, the build moved 20 truckloads of fabricated steel and 100 truckloads of refractory material.

The result: Six units were fabricated, erected, and fully lined to operational capacity. That's with zero safety incidents and single-point accountability from the first drawing to the final lining.

TEAM HIGHLIGHT ABOVE AND BEYOND

Steven Solley
Project Lead

Chad Givens
Sales Lead

Built for the Data Center Boom

Data center construction is reshaping American industry, and much of it is happening right here in Texas.

AAA Fabrication is supporting that build-out.

From structural steel and equipment supports to custom enclosures and platforms, our shop takes projects from engineering through delivery under one roof.
